Student Name: ____________________________ Student ID # ____________________________

UOSA Statement of Academic Integrity

On my honor I affirm that I have neither given nor received inappropriate aid in the completion of this exercise.

Signature: ____________________________ Date: ____________________________

Notes Regarding this Examination

Open Book(s) You may consult any printed textbooks in your immediate possession during the course of this examination.

Open Notes You may consult any printed notes in your immediate possession during the course of this examination.

No Electronic Devices Permitted You may not use any electronic devices during the course of this examination, including but not limited to calculators, computers, and cellular phones. All electronic devices in the student’s possession must be turned off and placed out of sight (for example, in the student’s own pocket or backpack) for the duration of the examination.

Violations Copying another’s work, or possession of electronic computing or communication devices in the testing area, is cheating and grounds for penalties in accordance with school policies.
Question 1: Well-Formed Formulas (10 points)

Consider the following well-formed formula: \((a \land b) \rightarrow (\neg a \lor \neg b)\)

A. Is it satisfiable? Justify your answer.

B. Is it tautologous? Justify your answer.

C. Draw its circuit diagram.
Question 2: Well-Formed Formulas (10 points)

Consider the following well-formed formula: \(((a \lor b) \land c) \leftrightarrow (\neg c \rightarrow \neg (b \land a))\)

A. Is it a contradiction? Justify your answer.

B. Is it tautologous? Justify your answer.

C. Draw its circuit diagram.
**Question 3:** Natural Deduction (10 points)

Consider the following partial theorem and corresponding partial proof:

Theorem: ?, ¬(a \lor b) \lor ? \vdash c

Proof:

\[
\begin{align*}
\neg (a \lor b) & \lor ? \\
& \vdash \text{False} \\
& \vdash \text{ID} \\
& \vdash \{\lor E\}
\end{align*}
\]

Rewrite the theorem and the proof, filling in the missing parts (marked with '?' in the theorem and proof). Mark all assumptions (if any) that will be discharged and indicate the rule citations that cause discharges.
Question 4: Natural Deduction (10 points)

Prove the following theorem using natural deduction: $\vdash a \rightarrow a$
**Question 5**: Natural Deduction (20 points)

Prove the following theorem using natural deduction: \( a \rightarrow b, b \rightarrow c \vdash (a \lor b) \rightarrow c \)
Question 6: Equational Reasoning (20 points)

Prove the following equation using the equations of Boolean algebra: \(((\neg a \lor b) \land a) = (a \land b)\)
Question 7: Equational Reasoning (20 points)

Prove the following equation using the equations of Boolean algebra: 
\(((a \land b) \land c) \lor a = a\)
